Dimensions: 9.5in. x 7.4in. x 0.3in.Excerpt: . . . the agglutinative method Then the language is agglutinative. As such, it may be prefixing or suffixing, analytic, synthetic, or polysynthetic. To return to inflection. An inflective language like Latin or Greek uses the method of fusion, and this fusion has an inner psychological as well as an outer phonetic meaning. But it is not enough that the fusion operate merely in the sphere of derivational concepts (group II), 108 it must involve the syntactic relations, which may either be expressed in unalloyed form (group IV) or, as in Latin and Greek, as concrete relational concepts (group III). 109 As far as Latin and Greek are concerned, their inflection consists essentially of the fusing of elements that express logically impure relational concepts with radical elements and with elements expressing derivational concepts. Both fusion as a general method and the expression of relational concepts in the word are necessary to the notion of inflection. But to have thus defined inflection is to doubt the value of the term as descriptive of a major class. Why emphasize both a technique and a particular content at one and the same time Surely we should be clear in our minds as to whether we set more store by one or the other. Fusional and symbolic contrast with agglutinative, which is not on a par with inflective at all. What are we to do with the fusional and symbolic languages that do not express relational concepts in the word but leave them to the sentence And are we not to distinguish between agglutinative languages that express these same concepts in the word--in so far inflective-like--and those that do not We dismissed the scale:...
